RESEARCH INTERESTS

•3D scene understanding, robotics; broadly, AI that understands physics

EDUCATION

•Korea Advanced Institute of Science and Technology, Daejeon

Mar. 2020 – Aug. 2027 (*Expected*)

B.S. in Electrical Engineering and Computer Science (Double Major)

GPA: 4.02/4.3

– *Coursework*: Machine Learning for 3D Data, Kalman Filtering (graduate), Mathematical Physics

•University of Texas at Austin

Aug. 2025 – Dec. 2025

Exchange Program

GPA: 4.0/4.0

PUBLICATIONS

[1] **SenseFuse: Label-Free Fusion of Image and Shape Encoders for Open-Vocabulary 3D Instance Segmentation** *Under review*

Euiseok Han, Tri Ton, Hwanhee Kim, Seungyeon Ryu, Chang D. Yoo

ICRA 2027 – IEEE International Conference on Robotics and Automation

[2] **Hamiltonian Invariant-Driven Mode-Transition IMM for Satellite Maneuver Detection**

Manuscript in preparation

Euiseok Han, Sangheon Choi, Seung-Hyun Kong

RESEARCH EXPERIENCE

•Artificial Intelligence Machine Learning Lab, KAIST

Jan. 2025 – Feb. 2025, Jan. 2026 – Present

Undergraduate Researcher / Advisor: Prof. Chang Dong Yoo

Daejeon, KR

- URP: *From Point Cloud to Actions: 3D Structural Keypoint-Conditioned Hierarchical Robot Policy Learning*
- Revealed that frozen 2D image and 3D shape encoders fail differently and are weakly correlated: Spearman ρ 0.08–0.23 and 5.9% identical wrong labels, versus 0.68 and 41.4% for a 2D–2D pair [1]
- Devised a framework that improves mask labeling by fusing 2D and 3D information via sensitivity maximization
- Proposed a closed-form, label-free scene-level weight calibration running in 3.5 ms; median +7.1 points and 93% of the oracle gain

•NC Lab, KAIST

Mar. 2025 – Aug. 2025

Undergraduate Researcher / Advisor: Prof. June-hwa Song

Daejeon, KR

- *Socially-appropriate Use of Noise-making Everyday Appliances in High-density Urban Housing*
- Participated in experiment design and conducted a preliminary experiment using Zigbee communication modules

•Control and Intelligent Systems Lab, KAIST

Jul. 2024 – Aug. 2024

Undergraduate Researcher / Advisor: Prof. Hee-jin Ahn

Daejeon, KR

- Reproduced *Constrained Policy Optimization (ICML 2017)* baselines in MuJoCo from the official code (safe RL)

SELECTED PROJECTS

•LLM-Guided Autonomous Robots

Mar. 2026 – Jun. 2026

EE40078 Introduction to Multi-disciplinary Robotics, School of Electrical Engineering

- LLM-guided autonomous mobile delivery robot; RTAB-Map localization, path planning, and object pick-up

•Hamiltonian Invariant-Driven Mode-Transition IMM for Satellite Maneuver Detection

Mar. 2026 – Present

MO50125 The Principles and Applications of the Kalman Filter, Cho Chun Shik Graduate School of Mobility

- Satellite maneuver detection; IMM transition probabilities driven by a CUSUM on the J_2 -Hamiltonian Lie residual [2]

•PintOS-KAIST

Sep. 2024 – Dec. 2024

CS330 Operating Systems, School of Computing

- Implemented kernel modules for process scheduling, syscall, memory management of an educational x86-64 OS

HONORS AND AWARDS

•Korea-U.S. Advanced Industries Youth Exchange Scholarship

Aug. 2025

\$9,000 for advanced-industry exchange study in the U.S.

OTHER EXPERIENCE

•Republic of Korea Air Force (mandatory military service)

Apr. 2022 – Jan. 2024

Information System Operator, Staff Sergeant, KAMD Operations Center

Osan Air Base, KR

- Operated real-time data processing servers for the Korea Air and Missile Defense (KAMD) center; 24/7 availability

TECHNICAL SKILLS AND INTERESTS

Programming Languages: C, C++, Python

Libraries: ROS, NumPy, PyTorch

Miscellaneous tools: MATLAB, L^AT_EX, Docker

Extracurricular: STROKE (Tennis Club)
